6. Cut required length of time fuse with the M2 cap crimpers, ensuring the ends are cut squarely.
7. Attach a fuse igniter to the time fuse by removing the shipping plug. Push the time fuse into the open end of the fuse igniter until it is fully seated. Tighten the fuse holder cap. Leave the safety pin attached to the igniter.
8. Hold the blasting cap between the thumb and ring finger of one hand, with the forefinger of the same hand on the closed end of the blasting cap.

## INFANTRY T&R MANUAL

9. Inspect the blasting cap by looking into the open end. Observe for presence of a yellow-colored ignition charge. Ensure dirt or foreign material is not present inside the blasting cap.
10. Hold the time fuse vertically, with the square cut end up, and slip the blasting cap gently down over the fuse so the flash charge in the cap touches the fuse.
11. Grasp the fuse with the thumb and ring finger, while applying slight pressure with the forefinger on the closed end of the cap. Use the opposite hand to grasp the M2 cap crimpers. Place the crimping jaws around the cap at a point 1/8 to 1/2 inch from the open end.
12. The thumb and ring finger hold the fuse are below the M2 crimpers. Rest the second finger of the hand holding the fuse on top of the crimpers to prevent the M2 cap crimpers from sliding up the cap.
13. Extend both arms straight out while rotating the hands so the closed end of the blasting cap is pointing away from the body and away from other personnel.
14. Crimp the blasting cap by firmly squeezing the M2 cap crimper handles together until the crimper handles stop coming together. Ensure the head is bowed while crimping so the face is not exposed in the event of accidental detonation of the blasting cap.
15. Inspect the crimp connection of the blasting cap and the time fuse.
16. Prime the charge by inserting the blasting cap into the explosive. Secure the blasting cap to the charge with a priming adapter or tape.
17. Remove the safety pin from the fuse igniter. Grasp the pull ring; turn the ring a 1/4 of a turn clockwise; and give it a quick, hard pull.
18. Lay the fuse igniter on the ground and seek cover.

2. Training Device (TD) and audiovisual support equipment is an integral resource in developing training plan, especially as funding restrictions increase. Unit training managers should ensure Training Device (TD) and audiovisual support equipment requirements are identified in the long-range plan and tracked through subsequent planning documents.

3. Training Device (TD) and audiovisual support equipment is a joint responsibility between the local CVIS manager and the unit training managers at all command echelons. Training managers must articulate requirements in the long-range plans and monitor their fulfillment as plans enter the training phase. Local CVIS managers must keep unit managers apprised of the status of requests so that the training plans and schedules can be dovetailed with local Training Device (TD) and audiovisual support equipment policies and procedures.
